Project Title: New York City Website

I'd like to build this site as multiple pages, rather than a long, single page website. Typical site navigation probably across the top. I think there is plenty of content and photography to build out individual pages.

- **Home Page/Introduction** – Introduce basic points about New York City. Set the tone for his social activism and impact.
- **History**
- **Boroughs**
- **Architecture**
- **Parks**
- **Sources** – https://en.wikipedia.org/wiki/New_York_City
